Diketahui pada grafik tersebut di atas, maka dapat disimpulkan bahwa:

The report by Austin argues risk minimization, instead of early high death tolls, occurred following the attack, and that the report also likely found many more civilian casualties. It also claims that because of the high death toll, the report must be incorrect, and that because the majority of the deaths occurred in the first 10 minutes, the report must be incorrect. The report by Austin argues that the report is incorrect, and that the report is incorrect, and that the report is incorrect. The report by Austin argues that the report is incorrect, and that the report is incorrect, and that the report is incorrect.
