Alginic acid Alginic acid is a natural polysaccharide derived from brown seaweeds. It is a linear chain of D-glucuronic acid units linked by 1,3-glycosidic bonds. It is a natural polymer with a high molecular weight, typically ranging from 100,000 to 1,000,000 g/mol. It is a natural polymer with a high molecular weight, typically ranging from 100,000 to 1,000,000 g/mol.
